INTRODUCTION

Today EHS regulations are spread over a number of acts and rules and there is no ready reckoner or a single guide to the same. For e.g. a MAH unit would have to refer to Factories Act, EPA, MSIHC Rules, Petroleum Acts & Rules, SMPV etc. Even an experienced professional in the field of EHS can find it difficult and in all probability would miss out on some critical issues. This course would enable the EHS professional to have an overview of all the important regulations and act as a ready to use checklist to fulfill the statutory requirements.

CONTENTS:

Some of the legislations which would be covered in this course are:

- The Environment (Protection Act) 1986
- The Factories Act 1948
- The Manufacture, Storage and Import of Hazardous Chemical (MSIHC) Rules, 1989
- The Static and Mobile Pressure Vessels (SMPV) Rules 1981
- Gas cylinders Rules 1991
- Petroleum Act 1934; Petroleum rules 2002
- The Hazardous Waste Management and Handling Rules 1989
- The Bio-Medical Waste Management and Handling Rules 1998
